**ZARN**—One of our own introductions. Many large growers consider this the very best variety they have in their orchard. As large as Elberta, and better colored and far better quality. Bears evenly on the tree and does not overbear. Holds up well after picking. Ripens about a week ahead of Elberta.

Black Russian is an extra hardy variety brought from Hungary many years ago. Good size and a good bearer. It has produced a good crop of cherries when all other varieties failed on several occasions.

Sweet Cherry, grown on Mazzard root are far superior to those grown on the ordinary root. They transplant better, last longer and produce better.
